★ Kai Actors!

Ever dreamed of being the star of your own show? Are you a modern-day Shakespeare? Well, then KidZania's Theatre is calling your name

Actors are a part of our every-day-lives, on the TV, at the theatre and even on the radio. The things that keep you entertained whilst you're bored at home have all been created by actors especially for you! But now it's your turn!

1 First, we need to create a stage!

Clear a space in your living room, your bedroom or even your garden for your performance to take place.

2 Next, we need some content!

Have a go at writing your own panto! This could be a monologue (lines for only person) or a duologue (lines for two people). It doesn't have to be long! One minute scripts are very popular performance pieces as they're short, fun and keep everyone's concentration!

3 Rehearse your piece!

Try to remember your lines without looking at the script. Practice with the other person or, if you're performing alone, have a go at reciting your lines in the mirror!

4 Get into costume!

Use your imagination – anything will do! If your character is a superhero, why not tie a blanket around your shoulders as a super kool cape? Or if your playing The Fairy Godmother, why don't you decorate a wooden spoon and wave it around as your magic wand? Or if you're playing Prince Charming, try making a crown out of some cardboard and decorate it with some jewels to show off your wealth!

5 Find an audience!

Place some seating in front of your stage (if you don't have enough chairs, just put some cushions on the floor for your audience to sit on). Gather whoever is around and invite them to the first ever performance!

6 Opening night!

Take a deep breath. 1, 2, 3 – that's your cue! Enjoy yourself whilst performing; smile, laugh and don't forget to take a bow at the end!

If you have created your own performance masterpiece, then why not show it off?
